

PointClickCare essentials™

Everything you need. Nothing you don't.

PointClickCare Essentials™ is a cost-effective solution that offers long-term care providers the core MDS, clinical and billing functionality necessary to conduct business, with the simplicity of a single common EHR platform. Information is shared across all processes from admission through to billing, saving your organization valuable time and resources.

PointClickCare Essentials™ Core Features

- ADT
- Resident/Census Management
- Billing & Accounts Receivable
- MDS & Automated Submissions
- Integrated Care Plans
- Reporting

Whether you're a single-home independent looking for basic clinical and billing capabilities, or a larger multi-site provider seeking to start small and expand your EHR system over time, PointClickCare Essentials™ delivers the same people, trusted approach, and technology that was once thought to be exclusive to large, multi-site organizations.

Powerful enough for chains, priced for independents.

With PointClickCare Essentials™, you get the benefits of an enterprise-quality EHR platform while only paying for the functionality you need today to streamline your business. Additionally, since it's the same platform that "the big guys" use, you can also be assured that if you ever want to extend your system, you can easily upgrade to another package, such as PointClickCare EHR™ or PointClickCare EHR Advantage™, at any time.

Access Best-Practice Processes: PointClickCare Essentials™ represents the clinical and billing best-practices of thousands of facilities throughout North America. For the first time, small providers have the ability to access and implement the most effective processes using the most widely-used software in long-term care.

Reduce Cost Through Operational Efficiency: PointClickCare Essentials™ enables small providers to create efficiencies in and across clinical, billing and administrative functions. Organizations can consolidate operations on a single integrated platform, while automating manual paper-based processes. This allows critical information to flow freely throughout the business, eliminating errors caused by rekeying data into multiple systems.

Mitigate Compliance Risk: PointClickCare monitors and manages changes in applicable regulation, including MDS and EHR Certification, for all customers using PointClickCare software. PointClickCare Essentials™ further ensures that survey and audit requirements can be met through a single EHR repository, detailed audit capabilities, care tracking and reporting.

Why PointClickCare?

PointClickCare removes the complexity of EHR, providing our customers with a proven formula for success that includes the flexibility, ease-of-use, and industry-leading technology your business can rely on. As the fastest growing EHR platform more than 5,000 long-term care facilities use to efficiently manage and automate their complex clinical and billing operations, why would you trust your business to anyone else?

PointClickCare delivers solutions specifically designed to meet the dynamic needs of the provider. The PointClickCare EHR™ package and the PointClickCare EHR Advantage™ package offer additional functionality and business value, extending core components of PointClickCare Essentials™. Please contact PointClickCare to determine the appropriate package for your organization.
