

PointClickCare® Point of Care

Point of Care (POC) enables front-line clinical staff to access key information, task lists and schedules, complete documentation, and receive alerts and messaging, all within close proximity to a resident.

Maximize Reimbursements

with complete capture of ADL information and MDS integration.

Improve Quality of Care

by returning time for care delivery and reducing administrative burdens.

Maintain Compliance

with complete and accurate documentation.

Increase Staff Productivity and Efficiency

PointClickCare POC offers an easy-to-use interface that enables nursing staff to document clinical care activities at or near the point of resident care. With POC, care workers can create timely, accurate and complete documentation to maximize RUG scores, while increasing the amount of time spent with residents and reducing cycles required for routine administrative tasks.

Accessed through kiosks, wall-mounted touch screens, or laptop computers, POC assures compliance and significantly increases the productivity and efficiency of care workers, thereby improving the facility's quality of care.

Simplified Design that's Easy for All Users

The POC user interface has been designed to be easy to learn, easy to understand, and easy to use – ensuring quick adoption among staff, whether they are experts or novices in web-based technology. All users are able to quickly orient themselves to the POC screens that include resident photos for easy identification, Quick Entry Groups, intuitive icons, and large, recognizable scroll bars and tabs. POC's multi-disciplinary features provide staff with a quick and easy way to capture all critical resident data, including activity attendance, ADLs, and vitals.

Easily identified care tasks

Quick Entry task & activity documentation for multiple residents

Recognizable scroll bar and tabs

Large, intuitive icons

Quick Entry screen

The Point of Care user interface has been designed to be **easy to learn**, **easy to understand**, and **easy to use** – whether you are an expert or novice in web-based technology.

"We implemented the entire PointClickCare Clinical and Financial application in our 200-bed facility in a seamless fashion. PointClickCare support staff are very helpful and responsive to our needs as an organization. People tend to adapt to technology that is user-friendly, and not intimidating; PointClickCare fits the bill, while improving our bottom line."

Bill O'Neil

Executive Director
Kensington Health Care

Real-Time Capture and Access to Resident Information

By eliminating manual, paper-based tracking methods, staff gains additional time to care for residents. Care workers can quickly access the most relevant and timely information to proactively address resident needs, and information captured at the bedside is instantly available to other users of PointClickCare. Accurate capture of ADLs and full integration with MDS assessments increases RUG scores. Clinical managers gain greater insight into day-to-day activities, monitoring the completion of care and resident status through dashboards and automatically generated alerts, in real-time.

Automated Workflow to Reduce Errors

POC's information controls eliminate copy-cat charting and enforce documentation policies. The integration of POC with other PointClickCare modules allows information to flow from the bedside directly to MDS and other assessments, as well as eMAR – reducing errors and omissions, and maintaining compliance.

At-a-glance View of Scheduled Tasks

Front-line care workers using POC technology are able to easily document critical resident information and manage all care tasks to be completed within their shift. Users can see pictures of all the residents under their care during that shift, as well as the scheduled care required for each. Auto-created Tasks appear on the POC screens based on resident admission to the center via Census or Quick ADT. Quick Entry Documentation Screens enable task and activity documentation for multiple residents at once, to save time and avoid duplicate data entry.

About PointClickCare

PointClickCare removes the complexity of EHR, providing our customers with a proven formula for success that includes the flexibility, ease-of-use, and industry-leading technology your business can rely on. As the EHR platform more long-term care facilities use to efficiently manage and automate their complex operations, why would you trust your business to anyone else?
