PointClickCare® Tray Card

Proper food and nutrition is the source of our well being. But did you know approximately 50% of long-term care organizations aren't using an automated nutritional management program? This lack of up-to-date information can cause frustration for employees, family members, and the residents themselves.

The quality of the resident dining experience can have a tremendous impact on satisfaction levels, and the reputation of your organization. In order to provide optimal care for the resident, the importance of proper nutritional services can no longer be undervalued.

The PointClickCare Tray Card offers:

- Automated management of admission, transfer (and discharge) of residents
- The ability to produce automated snack and ancillary item labels for each resident
- Enhancing the meal service and meal experience for residents and staff alike
- Increasing staff productivity and reducing costs
- Protecting your organization from non-compliance issues in food service

One Centralized Location for Resident Nutritional Profiles

The PointClickCare Tray Card provides one centralized location that stores resident information helping eliminate the chance of manual transcription errors, and provides caregivers with critical data about the needs of a resident including any special utensil requirements.

The PointClickCare Tray Card replaces disparate systems and manual processes to provide better management of the dietary needs of the resident. It also enables the electronic aggregation of all relevant information so that nutritional needs and preferences are always organized and tracked including therapeutic diets.

The Efficiency of an Automated Nutritional Program

It's documented that organizations without an automated nutritional program spend up to two or more hours each day, manually transcribing labels for resident snacks and supplements. However, with the PointClickCare Tray Card, this can be done in minutes. As well, you can customize snack labels specific to each resident, and instantly generate reports, ensuring regulatory compliance while enhancing the cost-efficiency of every meal.

Protection from Non-Compliance and Citations

Your staff will be able to update and track multiple nutritional records such as snack lists, likes/dislikes, allergies and special requests automatically. With this level of automation and information at your fingertips, you can protect your facility from non-compliance issues in food service, and easily comply with regulatory requirements. In addition, ancillary logistics can be designed based on the needs of the resident and dining room specifications—allowing for optimized seating plans, table set-up, and adaptive equipment placement.

Enriching Lives Through Technology

PointClickCare Tray Card is yet another way we enrich lives through technology; it's the perfect solution to automate and enhance meal services, streamline nutritional information, increase staff productivity, and provide optimum care to your residents while helping you to remain in regulatory compliance.

About PointClickCare

PointClickCare helps healthcare providers meet the challenges of senior care by enabling them to achieve the business results that matter – enriching the lives of their residents, improving financial and operational health, and mitigating risk. Recently recognized as the #1 long-term care software vendor by KLAS Research, PointClickCare's cloud-based software platform takes a person-centered approach to managing senior care, connecting healthcare providers across the senior care continuum with easy to use, regulatory compliant solutions for improved resident outcomes, enhanced financial performance, and staff optimization. Over 10,000 skilled nursing and senior living facilities use PointClickCare today, making it the North American healthcare IT market leader for the senior care industry.
